

Sustainable Energy Seminar

Sustainable Energy Seminar

Our Sun. When to Use it, When to Refuse it.

Thursday, May 14, 2009

9:00am – 10:30am

Continental Breakfast

**For Homeowners, Contractors, Building Owners/Managers
Residential and Commercial**

Scott Lawrence of Solar Concepts / Solatube and Richard Lawrence of Dependable Solar Products / ETA Engineering will lecture on the basic features, benefits, energy savings, cost and environmental impact for three exciting solar related sustainable technologies.

Daylighting - Using the sun to light our homes and buildings.

Solar Powered Attic Fans - Why is it 180° in the attic?

PV Solar Electric - How does it work, what size is right, cost, tax incentives?

Where: Solar Concepts
916 S. 52nd Street
Tempe, AZ 85281
* Just south of University

RSVP @ 480-968-1777
\$9.95 in advance (all credit cards accepted)
\$20 at the door
LIMITED SPACE

For humans to live sustainably, the Earth's resources must be used at a rate at which they can be replenished. However, there is now clear scientific evidence that humanity is living unsustainably, and that an **unprecedented collective effort is needed** to return human use of natural resources to within sustainable limits.
